

LOSS PREVENTION

The first step towards reducing Workers' Compensation costs is educating employers and employees about improving safety in the workplace. The Trust will accomplish this vital educational process through the efforts of providing loss control services.

The [Fuel Marketers Insurance Trust](#) program must take an aggressive stand on loss prevention. [Alternative Risk Services, LLC](#) loss prevention staff will work closely with members to help promote a safe workplace, which will result in a stable Trust.

Their responsibilities will include:

- Involvement in the screening of future Trust applicants
- Conducting workplace inspections
- Making specific recommendations

This will not be an adversarial relationship, but one of a mutual desire to prevent losses in the workplace. Timetables for implementation of recommended safety measures and programs will also be provided. The loss control consultants are highly qualified to work with your internal loss safety committee in trying to help reduce losses for yourself and the Trust.

[Alternative Risk Services, LLC](#) will institute a number of valuable educational programs for the members including assistance in setting up internal safety programs and developing safety policy.

Educational programs for [Fuel Marketers Insurance Trust](#) members will include periodic special reports. [Fuel Marketers Insurance Trust](#) loss control services will also conduct seminars throughout the state on topics such as emergency planning and crisis management, ergonomics and safety in the workplace. In addition to producing educational publications and seminars, [Fuel Marketers Insurance Trust](#) will be active in bringing the concerns of the members regarding Workers' Compensation reform to the attention of the Kansas state government and the media.

[Alternative Risk Services, LLC](#) loss prevention specialists will provide the members of [Fuel Marketers Insurance Trust](#) with the information they need to aggressively pursue increased safety practices and ultimately reduce workers' compensation costs.
